## 1 Introduction

Vodafone Email Plus™ gives you real-time access to your favourite email accounts on your mobile phone. It works with a large number of free or paid for email accounts, including Microsoft Exchange, Gmail, Hotmail, and standard IMAP/POP3-enabled mailboxes.

Vodafone Email Plus can also access and synchronise PIM (Personal Information Management) data such as contact lists, calendar entries, and task lists. Any updates to your PIM data are automatically delivered to your mobile phone, keeping you connected to your important information wherever you are.

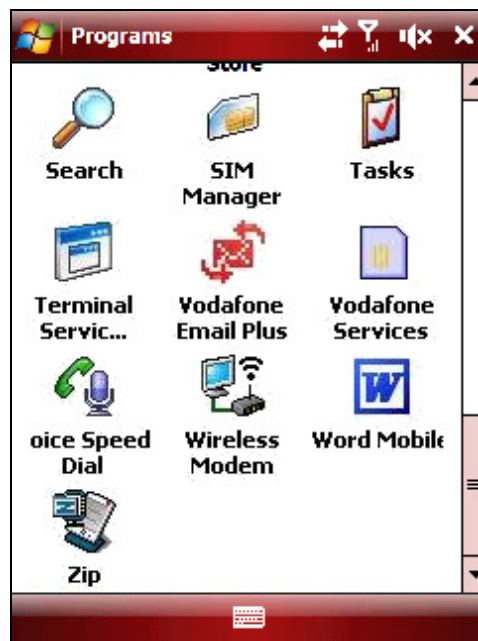

Vodafone Email Plus Online is a secure website that backs up and stores your PIM data. Your mobile phone and Vodafone Email Plus Online are always synchronised. Using Vodafone Email Plus Online you can update your address book and calendar from any web browser. Even if you switch mobile phones or lose your mobile phone, your information from Vodafone Email Plus Online is easily transferred to a new mobile phone.

**NOTE:** To use Vodafone Email Plus, you must have a subscription. If you do not yet have a subscription, please contact your local Vodafone Retail Store or ring Vodafone Customer Service on 1907.

---

## 2 Installing Vodafone Email Plus

Vodafone Email Plus icon may be located in the Programs screen. You may also find the Vodafone Email Plus setup prompt on the Home screen of your mobile phone. Tap the icon or the setup prompt to activate the service and add your email accounts as described in this user guide.

*Figure 1: Vodafone Email Plus Icon*

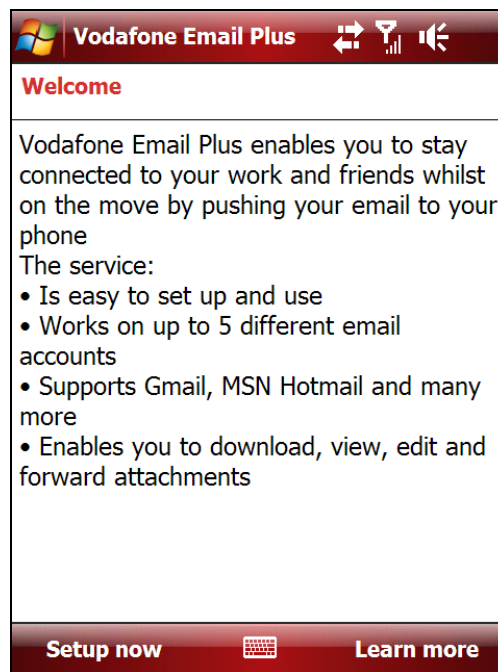

There are currently three ways to install and setup Vodafone Email Plus on your mobile phone:

- **Vodafone Email Plus Icon:** The Vodafone Email Plus icon (as shown in Figure 1) assists with installing the software. See Section 2.1: Setup by using the Vodafone Email Plus icon on page 5 for the installation procedure.
- **Web browser:** If you do not have the Vodafone Email Plus icon on your mobile phone, use the mobile web browser to download the correct software. See Section 2.2: Setup by downloading the Vodafone Email Plus software from the web on page 8 for more information.
- **Upgrading:** If you are upgrading from Vodafone Business Email to Vodafone Email Plus, see Section 2.3: Upgrade from Vodafone Business Email to Vodafone Email Plus page 11.

## 2.1 Setup by using the Vodafone Email Plus icon

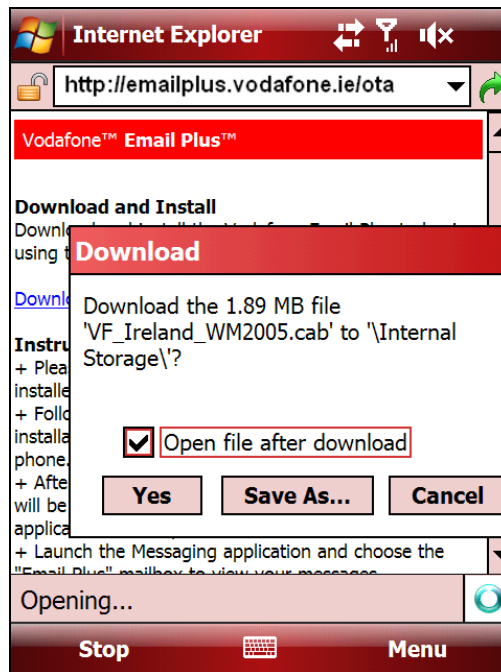

Follow the procedure below if the Vodafone Email Plus icon is on your mobile phone.

1. Navigate to **Start > Programs** and select the Vodafone Email Plus icon from the Programs screen.

*Figure 2: Welcome Screen*

2. The mobile browser opens. Tap **Setup Now** in the Welcome Screen. If you need more information about Vodafone Email Plus, tap **Learn More**.

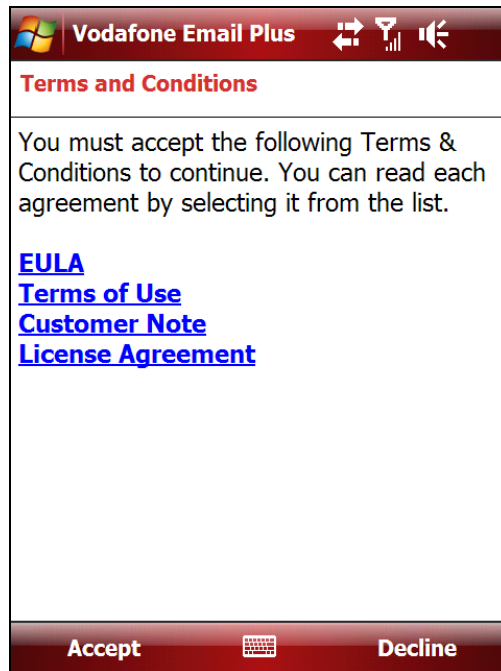

**Figure 3: Download Screen**

3. Your mobile browser will automatically open the download website, and the software download begins. If the download does not start, click the **Download Software** link.
4. Tap **Yes** to confirm that you want to download and install the software. In order to install the software after the download, ensure the “Open file after download” option is ticked.

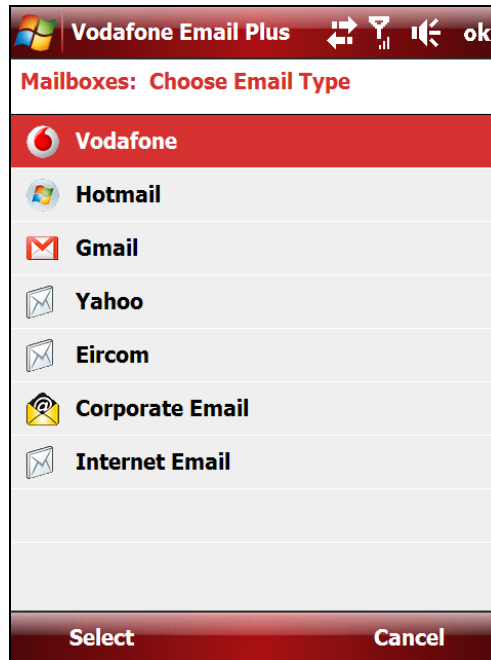

**Figure 4: Downloading and Installation Process**

5. The progress bar indicates that the software is downloading and then installing on your mobile phone.

*Figure 5: Terms and Agreements Screen*

6. When installation finishes, you will be shown terms and conditions. Tap each link to read the End User License User Agreement (abbreviated EULA), Terms of Use, Vodafone Customer Note, and License Agreement. Tap **Accept** to continue installation. If you do not wish to continue installation, tap **Decline**.

*Figure 6: Choose Email Type*

7. Select the type of email account to set up. For more information about setting up your email, see Section 3: Setting up your email on page 12.

**NOTE:** If you have any problems with the installation process, contact Vodafone Customer Service at 1907.

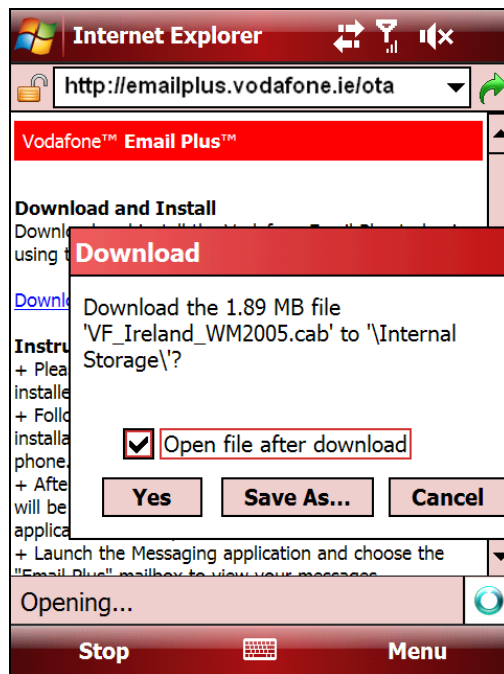

## 2.2 Setup by downloading the Vodafone Email Plus software from the web

When you signed up for Vodafone Email Plus, you may have received an SMS with a link you can use to download the Vodafone Email Plus software. Please check your SMS Inbox for this message. Select the link in the SMS to open the mobile web browser to the download site. If you cannot find the message, please follow the procedure described below to install Vodafone Email Plus.

1. Tap the link provided in the SMS. If you did not receive an SMS with the link, open Internet Explorer from the main menu on your mobile phone. Enter the following URL in the browser

<http://emailplus.vodafone.ie/ota>

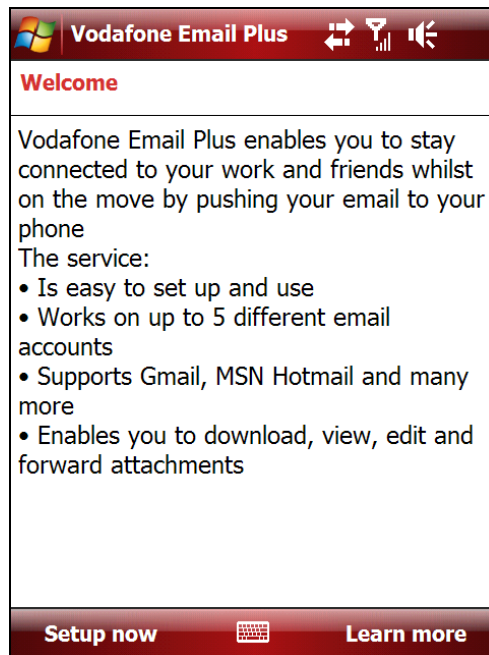

*Figure 7: Download File*

2. Tap **Yes** to download and install the selected file. In order to install the software after the download, ensure the "Open file after download" option is ticked.

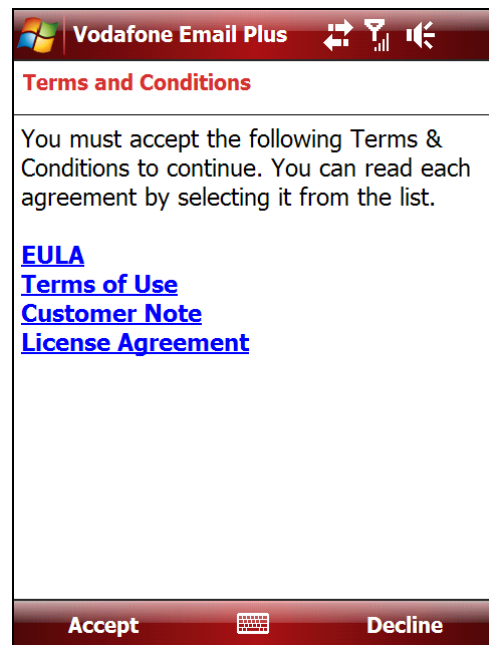

**Note:** If download does not start immediately, tap the **Download Software** link.

A progress bar displays the download and installation progress.

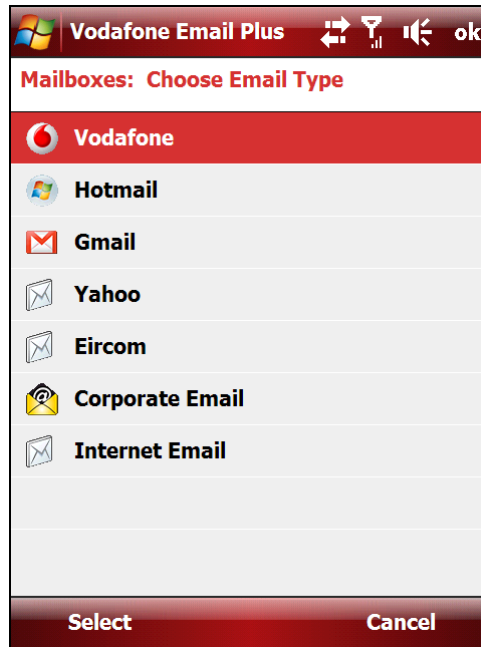

*Figure 8: Welcome Screen*

3. Tap **Setup Now** in the Welcome Screen. If you need more information about Vodafone Email Plus, tap **Learn More**.

*Figure 9: Terms and Conditions Screen*

4. Tap each link to read the End User License User Agreement (abbreviated EULA), Terms of Use, Vodafone Customer Note, and License Agreement. Tap **Accept** to continue installation. If you do not wish to continue installation, tap **Decline**.

*Figure 10: Choose Email Type*

5. Select the type of email account to set up. For more information about setting up your email, see Section 3: Setting up your email on page 12.

**NOTE:** If you have any problems with the set up process, contact Vodafone Customer Service on 1907.

## 2.3 Upgrade from Vodafone Business Email to Vodafone Email Plus

Before attempting to upgrade you must verify that your Vodafone Business Email account is still active and you must be using a mobile phone supported by Vodafone Email Plus.

If you are an enterprise customer and want to upgrade from Vodafone Business Email to Vodafone Email Plus, you must first sign up for the service. If you use Microsoft Exchange at your company, you may be offered an equivalent service that is able to access your Microsoft Exchange account through Outlook Web Access. Ask your VES administrator for assistance with uninstalling the Vodafone Business Email software on your mobile phone. Then contact Vodafone Customer Service to sign up for the Vodafone Email Plus service.

Please follow the procedure described below to upgrade your software and activate Vodafone Email Plus.

1. Launch the Vodafone Business Email application.
2. From the Status screen, select **Menu -> Upgrade** to request an upgrade of the software application.
3. The new Vodafone Email Plus software downloads and is then installed on your mobile phone.
4. You will be asked to complete the same steps as when downloading the Vodafone Email Plus software from the web (see Section 2.2: Setup by downloading the Vodafone Email Plus software from the web on page 8 for more information).

## 2.4 Using Vodafone Email Plus on two mobile phones

You can activate Vodafone Email Plus on two mobile phones.

1. Install Vodafone Email Plus and set up the mailboxes as described in the procedures below.
2. Transfer your SIM card from the first mobile phone to your other mobile phone.
3. Click on the Vodafone Email Plus icon. When you connect to the service, you are prompted to enter your password for each of the mailboxes you have set up. As soon as you enter your password for each mailbox, a mailbox is created and activated on the second phone.
4. Vodafone Email Plus automatically connects to deliver email messages and PIM updates. You are now logged in and able to use Vodafone Email Plus on your second phone.

**NOTE:** You can switch back and forth between two phones, e.g. one business phone during the week and one personal phone during the weekend.

---

## 3 Setting up your email accounts

Once Vodafone Email Plus is connected, you are prompted to set up mailboxes for your email accounts. You must have at least one account set up in order to be able to use Vodafone Email Plus. Using Vodafone Email Plus, you can activate up to 5 separate mailboxes at the same time. Vodafone Email Plus will continuously update these mailboxes and any associated PIM data. If you have PIM data associated with a Microsoft Exchange account, your PIM data also continuously updates. PIM data from email service providers is not included.

Choose your first mailbox from the selection offered. The selection includes the most popular Internet Email services in your country along with a Corporate Email option for access to Microsoft Exchange accounts. If you do not see your Internet email provider listed, select **Internet Email** and complete the fields with the required information.

When you set up your mailboxes, your address book, calendar, and task list are backed up in Vodafone Email Plus Online. For more information about using Vodafone Email Plus Online, see section 6: Vodafone Email Plus Online on page 38.

For information on how to set up your Microsoft Exchange account, see Section 3.1: Microsoft Exchange account on page 12.

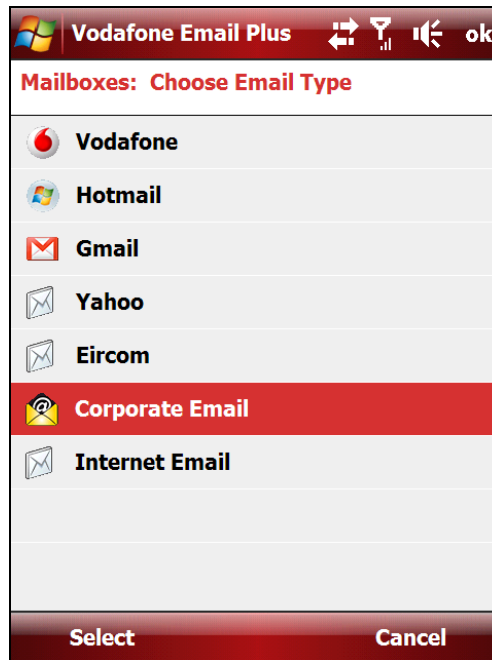

For information on how to set up a Email Service Provider account (Hotmail or Gmail) or Internet email account, see Section 3.2: Other accounts on page 17.

### 3.1 Microsoft Exchange account

By using Vodafone Email Plus to access Microsoft Exchange, you can synchronise email, contacts, calendar entries, and task list with your mobile phone. You can receive your Microsoft Exchange information on your mobile phone without worrying about servers or synchronising with your PC.

### 3.1.1 How to set up a mailbox

1. When you first install Vodafone Email Plus, a prompt appears asking if you want to set up your mailbox. Select **Yes** to set up a mailbox.

*Figure 11: Select Corporate Email*

2. Select **Corporate Email**. (**Note:** This option is only applicable if your company or hosting provider has given you a Microsoft Exchange account.)

**Set Up Account (1/3)**

Enter your work email address and password.

**Email address**

@

Should be the same as you use at work, e.g. my.name@mycompany.com

**Password**

Often the same you use to login to your computer at work.

Login Menu

*Figure 12: Enter Login Information*

3. Enter your Microsoft Exchange email address and password. Tap **Login** to login. Vodafone Email Plus will attempt to discover your domain information and log in to your exchange account. If Vodafone Email Plus is unable to find your server, you are prompted to enter technical settings as indicated below.

**Server Address (2/3)**

Enter the e-mail server web address.

**Email Website:**

https://

That is web address you have bookmarked or that you type into Web Browser to access your email remotely. Example: https://mail.company.com/owa

☒ Only connect if secure (SSL)

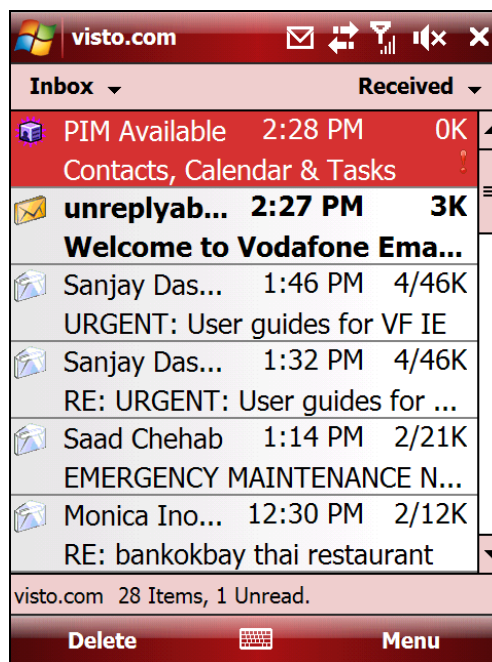

Login Menu

*Figure 13: Server Address*

- a. If Vodafone Email Plus cannot automatically discover your account, you are prompted to enter the web address you use to access Outlook Web Access for Microsoft Exchange (i.e. this is the web address you need to enter when accessing your Exchange mailbox over the internet). Select "Only connect if secure (SSL)" to login in over a secure connection (recommended). Click **Next**.
- b. If you use Microsoft Exchange for company email, you may need to enter your Windows user name (use to login to your computer) and Windows Domain (the domain your computer is on). Your company's IT Department can provide this information. Click **Options > Login**.

**Note:** This is only required if access to your company's Exchange domain is authenticated through Windows security.

4. The Login progress bar displays. When you are successfully logged in, a progress bar indicates that your mailbox is setting up.

**Figure 14: Exchange Inbox**

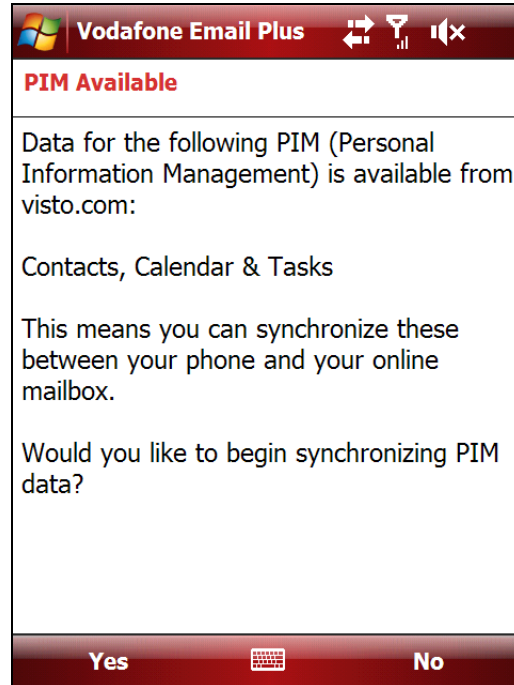

5. Your mobile phone receives email from your Microsoft Exchange account. The first fifty email messages synchronise to your Vodafone Email Plus account after you set up your mailbox for the first time. For information on how to use your inbox, see Section 4: Using Vodafone Email Plus on page 22. For information on how to use Microsoft Exchange data, see Section 5: Working with Exchange and PIM Data on page 33.

### 3.1.2 How to add PIM data

If new appointments, task lists, and contacts are available in your Microsoft Exchange account, a message at the top of your Exchange mailbox indicates that Personal Information Management (PIM) data is available for synchronising to your mobile phone. This allows you to synchronise your Contacts, Calendar and Task data from your Exchange account to your mobile phone. The PIM Data prompt appears if PIM data is present in your Microsoft Exchange account and on your mobile phone.

If your mobile phone has no contacts, appointments, or tasks, you are not prompted to synchronise your PIM data. **NOTE:** You can always add PIM later by selecting **PIM Available** from the Status screen. For more information about the Status Screen, see page Section 4.1: Status screen on page 22.

1. Tap the **PIM Available** message at the top of your Exchange mailbox.

*Figure 15: PIM Available*

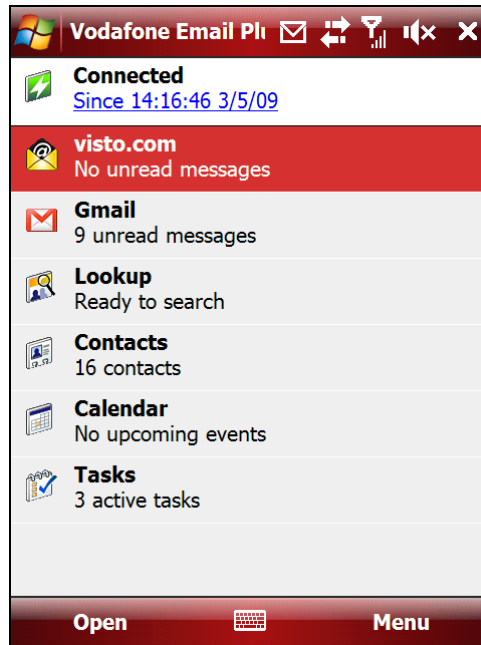

2. Tap **Yes** to synchronize your PIM data to your mobile phone.
3. Decide whether to combine or replace PIM data on your mobile phone. Tap **Combine** to confirm combining PIM data (recommended).

**NOTE:** If you decide to combine your Exchange PIM data with PIM data on your mobile phone, you may see duplicate entries in your contacts, calendar, and task lists. This occurs if you have the same contacts in both your Exchange account and on your mobile phone.

Alternatively, you can tap **Menu > Replace** if you want to delete all contact, calendar, and task information from your mobile phone and replace this with contacts, calendar, and tasks from your Microsoft Exchange account.

4. Tap **Continue** to confirm PIM data.

*Figure 16: Status Screen with showing PIM data*

5. Microsoft Exchange synchronises contacts, calendar, and task entries to your mobile phone. You can view and update your calendar, task list, and contacts. See Section 5: Working with Exchange and PIM Data on page 33 for more information.

**Note:** You can manage duplicate PIM information using Microsoft Exchange on your PC. Any edits in your Microsoft Exchange account are sent over the air to your mobile phone. If you have many entries in your Exchange contact list, calendar, and task list, PIM data synchronisation may take several minutes and up to several hours. If the synchronisation process is slow, disconnecting from and reconnecting to the Vodafone Email Plus service may help. Please allow a few minutes to several hours for your PIM data to reach your mobile phone when activating your account.

## 3.2 Other accounts

**Email Service Provider accounts** are connections to the large email service providers, such as Gmail and Hotmail. When using Vodafone Email Plus in conjunction with an account on any of these email domains, you get two primary benefits beyond the standard capabilities of Internet Email accounts:

- Ability to get near instant delivery of new email to your mobile phone.
- Ability to search for or lookup contacts in the email address book directly from your mobile phone.

**Internet Email accounts** are connections to regular POP or IMAP enabled ISP mailboxes. When using Vodafone Email Plus in conjunction with any of these standard accounts, you will receive new email on average every 15 minutes.

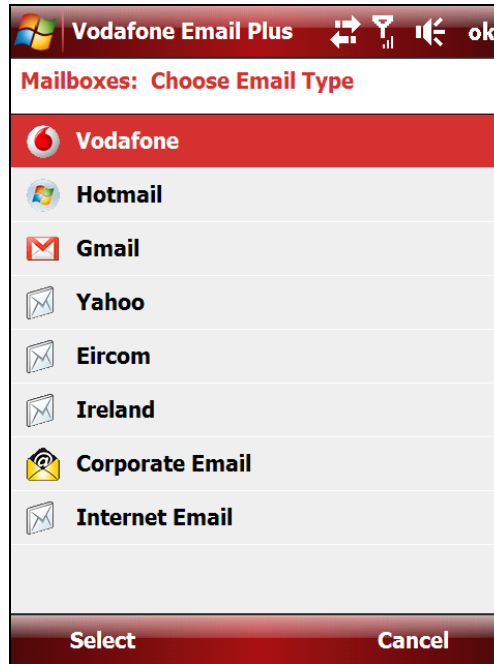

**NOTE:** Before adding your Internet Email account, please make sure you have POP enabled in your account. If you do not know how to enable POP, contact your ISP provider for more information. If POP is not enabled, you will not be able to login and retrieve email using Vodafone Email Plus.

**NOTE:** If you want to add a Yahoo mailbox, add your Yahoo email account using the Internet Email option.

### 3.2.1 How to activate a mailbox

This section describes how to set up a mailbox from your Email Service Provider or Internet Service Provider.

1. When you first install Vodafone Email Plus, you are prompted to select an email account from a list.

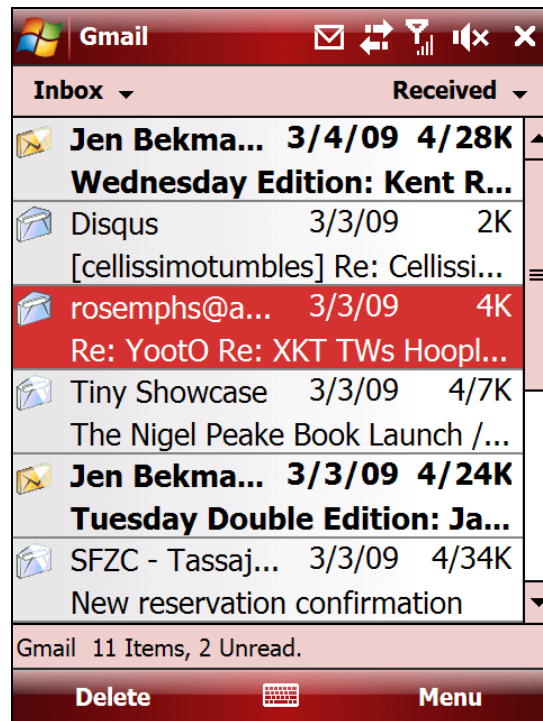

*Figure 17: Email Accounts*

2. Select one of the named accounts from the list of email providers. Or select **Internet Email** if you want to set up a standard mailbox using an ISP that is not explicitly mentioned on the list.

The screenshot shows a mobile application interface titled 'Vodafone Email Plus'. Below the title bar is a 'Setup Account' section. It features the 'Google Mail BETA' logo. There are two input fields: 'Username' with the text '@gmail.com' and 'Password'. At the bottom of the screen are two buttons: 'Login' and 'Cancel'.

*Figure 18: Login Example for Gmail Account*

3. Enter your email address in the Email Address or Username field. **NOTE:** For certain named email service providers the domain name may be pre-filled by default, but you can edit this text to login to a specific domain hosted by this email service provider.
4. Enter your login password in the Password field.
5. Tap **Login**.
6. If your login fails, the email setup screen indicates that you will need to provide technical settings such as your Login Name and Mail Server. If this occurs:
  - a. Tap **OK**.
  - b. Verify that you have entered the correct email and password. Click **Login**.
  - c. Enter your Login Name and the Mail Server. Tap **Login**.
7. Accept any Terms of Conditions that may appear.
8. A progress bar displays the email retrieval process.

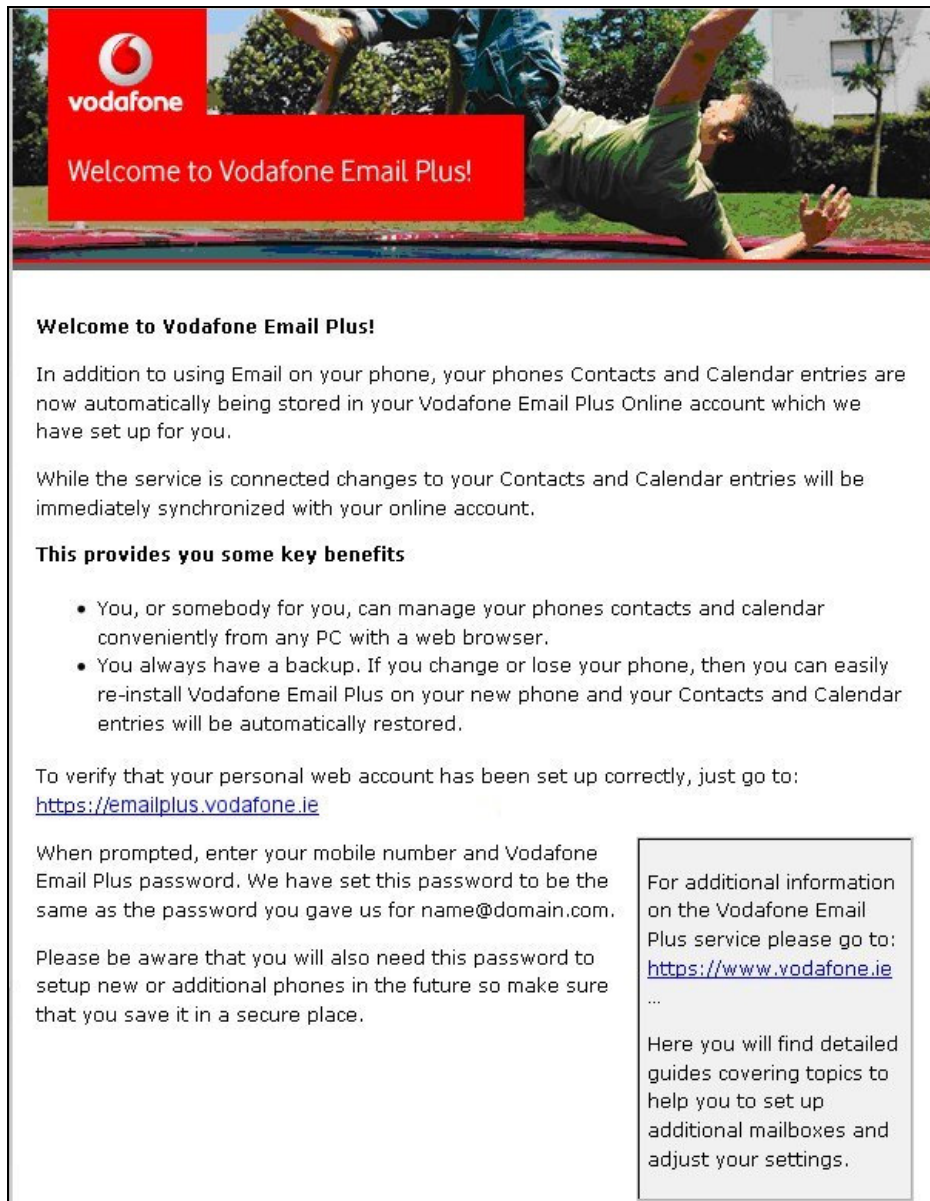

*Figure 19: Email Inbox*

- If your attempt to login is successful, the inbox appears on the screen. The first fifty email messages synchronise to your Vodafone Email Plus account after you set up your mailbox for the first time. For more information about using your email, see Section 4.3: Working with emails on page 25.

### 3.3 Welcome email

When you have activated your first mailbox using Vodafone Email Plus, you will receive a welcome email in your email account. This welcome email introduces the Vodafone Email Plus service and explains how to find and login on the Vodafone Email Plus Online website.

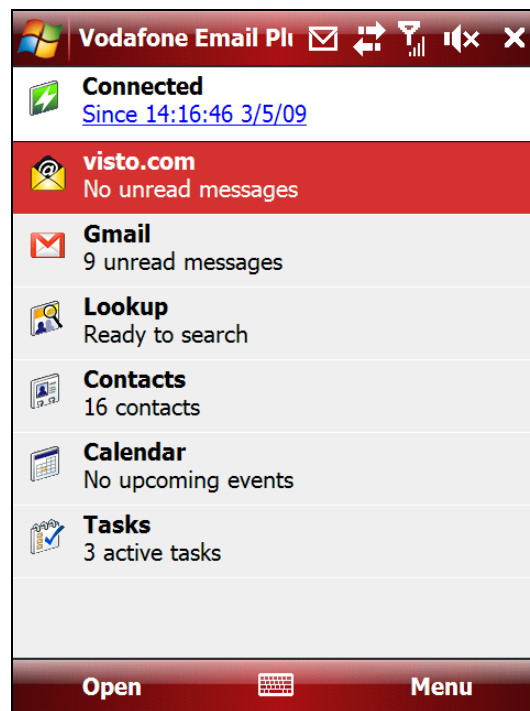

**Figure 20: Welcome Email**

## 4 Using Vodafone Email Plus

### 4.1 Status screen

Once you have created your first mailbox, your mobile phone will display the Vodafone Email Plus **Status** screen. This screen shows the connection status of your email service with the date and time of the most recent network activity and each mailbox account you have set up. Your mailbox account will indicate the number of unread messages, if any. You can access this **Status** screen any time by clicking the Vodafone Email Plus icon from your mobile phone's main menu.

You can opt to keep the Status screen closed. Closing the Status screen does not disconnect you from the Vodafone Email Plus service. When the Status screen is closed, Vodafone Email Plus continues to run in the background. You can set up your home screen to list your email accounts, as described in Section 4.2.2: Home screen on page 25.

**Figure 21: Status Screen**

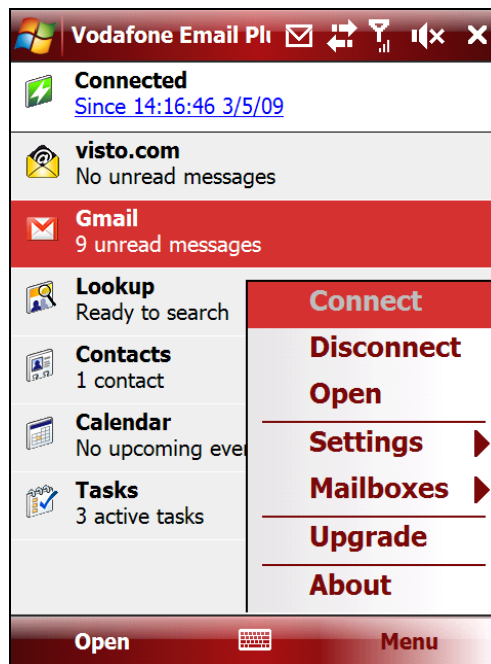

By default, each mailbox is labelled according to the domain name of the email address on that account. For example, if your Exchange account receives email at the address, [jqpublic@bigcompany.com](mailto:jqpublic@bigcompany.com), the name of the Mailbox account will be "Bigcompany".

- Change the mailbox alias by selecting **Menu > Mailboxes > Edit Mailbox** and specify a new label (you will need to provide your mailbox password to update the label).

- To add another mailbox, select **Menu > Mailboxes > Add Mailbox** and you will be shown the list of email providers.
- Tap **Lookup** to search for a contact in any of your email address books (either Microsoft Exchange, Gmail, or Hotmail depending on which mailboxes you have activated in Vodafone Email Plus).
- Tap **Contacts** to view your contact list.
- Tap **Calendar** to view your appointments. For more information about your calendar, see Section 5.2: Calendar on page 35.
- Tap **Tasks** to view your task lists. For more information about your task list, see Section 5.3: Task list on page 37.

#### 4.1.1 Status Screen menu

The Status menu provides options for managing your mailboxes.

**Figure 22: Status Screen Menu**

You can use the menu to connect or disconnect from the Vodafone Email Plus service and open a selected mailbox.

**Settings** allows you to set a connection schedule and message limit. The connection schedule provides an option to manage the day/time when Vodafone Email Plus should connect to receive email and PIM updates, while the message limit can be used to configure the number of messages to store in your mailbox on the mobile phone. See Section 7.4: Settings on page 47 for more information.

**Mailboxes** allows you to add a new mailbox, delete the selected mailbox, and edit a selected mailbox. Editing a mailbox allows you to assign a new label for the mailbox, update the mailbox password if you have recently changed the password, or configure a signature to be appended to all email sent.

**Upgrade** allows you to manually check if there is an upgrade to the Vodafone Email Plus software for your mobile phone. However, you are automatically notified of any new software upgrades so this function is rarely used.

**About** provides the version number and specific information about the Vodafone Email Plus service.

## 4.2 Accessing your email accounts

This section describes how to access your email account and use the features. For information about features available only for a Microsoft Exchange Account, see Section 5: Working with Exchange and PIM Data on page 33.

Select your email account from the **Status** screen. If you have unread messages, the inbox will open to the first unread messages. If there is no new email, your inbox will appear.

You can use your mobile phone's settings function to set an alert for when you receive a new email message. See the user manual for your mobile phone for more information about setting alerts for your mobile phone.

### 4.2.1 Inbox

Incoming messages are displayed in the **Inbox**. By default, messages are sorted by date, with the most recent message listed first. Tap the down arrow in the top right to sort by Message Type, From, and Subject.

Tap **Menu > New** to compose a new email message. See Section 4.3.4: Composing new emails on page 30 for more information.

To respond to the selected email, tap **Menu > Reply**. You can select to reply to the sender or to all email recipients. See Section 4.3.3: Replying to/forwarding an email on page 25 for more information.

To forward the email, select **Menu > Reply > Forward**.

To move the selected message to another folder, select **Menu > Move**. **Note:** This will only move the message into another folder on your mobile phone. The inbox is the only folder that is synchronised with your ISP mailbox.

While you are in the inbox view, you can switch to another account by selecting **Menu > Go To**. Select the email account from the list.

Tap **Menu > Tools** to access sorting options and messaging options. The tools available are **Sort By**, **New Account** and **Options**. Sort by allows you to sort Inbox messages by Message Type, From, Received, and Subject. New Account allows you to add a new mailbox. However, it is recommended that you use the Add Account functionality from the **Status** screen. Options allows you to add a custom signature for each of your mailboxes. For more information about signatures, see section 4.3.7 Adding an email signature on page 32.

## 4.2.2 Home screen

If you look at the home screen when your mobile phone is in idle mode, you can still monitor the status of Vodafone Email Plus and your mailboxes.

*Figure 23: Home Screen*

For each mailbox, the label of the mailbox appears and you can view the number of new, unread email messages.

The status of your Vodafone Email Plus connection is also shown, e.g. Connected, Disconnected, Waiting, etc. **NOTE:** You will only receive email messages and PIM updates when Vodafone Email Plus is connected.

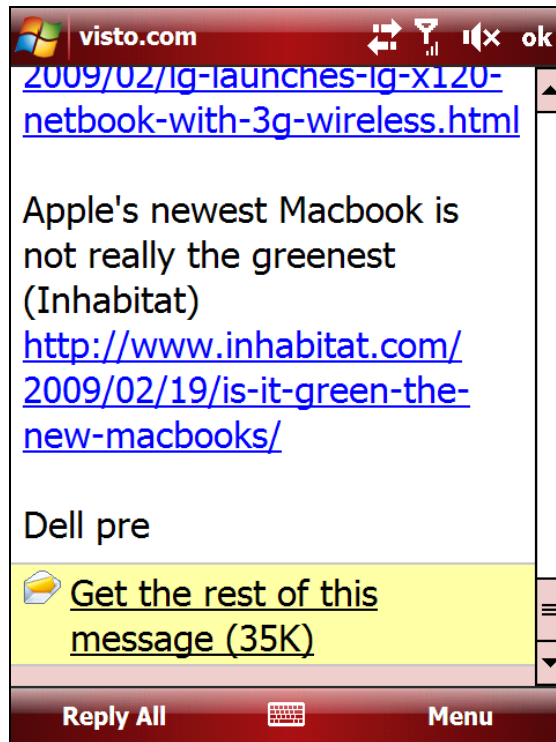

## 4.3 Working with emails

This section describes how to read, reply to, forward and create new email messages.

### 4.3.1 Reading an email

To read an email, scroll to the email, and tap to select the email. The email message appears. Viewing the email also provides you with several options for working with email.

To save space and allow for quick message retrieval, your messages will initially be displayed with header, subject and part of the text. The rest of the text is often truncated if the size of the email goes beyond 2Kb.

**Figure 24: Truncated Message**

For each message, you can download the full text by selecting **Menu > Download Message**. You can also scroll through the email message and select the "Get the rest of this message" link.

If the email message is in HTML format, you are able to view the full HTML version of the message when downloading the full text. See Section 4.3.1: Viewing an HTML email on page 27 below for more information.

To delete the email, select **Menu > Delete**.

To reply to the email you are reading, tap **Reply All**. If you need more options, select **Menu > Reply**. You can also **Forward** the email message.

To change text size or languages, select **Menu > View**.

If you want to add the email address of the sender to your contact list, select the email address in the header. Tap **Save** to save the email address in the address book on your mobile phone. You can either create a new contact or update an existing contact.

- When you create a new contact, the email field is populated with the email address. Tap **Save**.
- When you opt to update an existing contact, select the contact from the list. The email field is populated with the email address. Tap **Save**.

To exit, tap the X in the top right corner to return to the status screen. To return to the email inbox, click **OK**.

An email message can contain hotlinks such as a phone number, an email address, or a web address. You can click on the hotlink provided in an email message. Clicking on the phone number calls the number. Clicking on an email address creates a new email with the email address. Clicking on a web address opens the mobile phone browser to the web address.

### 4.3.2 Viewing an HTML email

Vodafone Email Plus now supports display of HTML email with fonts, colours, rich formatting, and embedded or external images. HTML email is more visual than basic text and offers a richer email viewing experience.

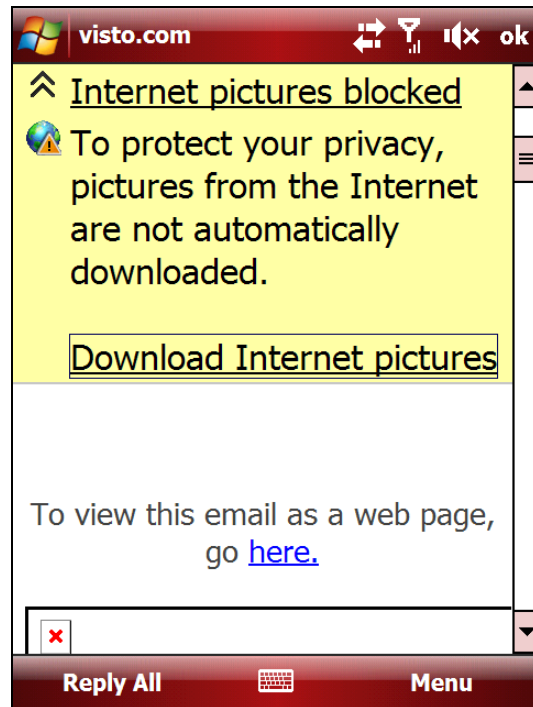

To read an HTML email:

1. Open the email message in your inbox. The email appears as a truncated, plain text email.
2. Tap the **Download Now** link to download the full message.

*Figure 25: HTML Email Image Security*

3. The HTML elements download without the graphics. External images will appear as placeholders to protect you from any security risk of downloading external references (the behaviour in Microsoft Outlook is similar). To retrieve all external images and view all graphics in the HTML Email, tap the **Internet pictures blocked** link.

*Figure 26: Download Internet Pictures*

4. Tap the **Download Internet pictures** link.

*Figure 27: HTML Email*

5. The HTML features load. The scroll to the right, tap on the **Tap to scroll right** link. Use the scroll bars to navigate through the email.

You can reply to an HTML email using the smart reply feature. For more information, see Section 4.3.3 Replying to/forwarding an email below.

**Note:** If HTML is not available, the body text is displayed in plain text format.

**Note:** Hotmail accounts do not currently support this feature.

### 4.3.3 Replying to/forwarding an email

When you reply to or forward an email from your mobile phone, Vodafone Email Plus offers the convenience of a smart reply/smart forward. This means that text you enter on your mobile phone is added to a full copy of the email from your mailbox before the reply/forward is sent to the recipients. If you are viewing a truncated message, you do not need to download the full message to your phone and then reply or forward everything from your phone over the air back to the server.

Instead you can send a quick reply or forward from your phone and Vodafone Email Plus will automatically create the outbound message by appending the equivalent server copy of the email message direct from your mailbox with all attachments and full HTML or plain text format. This means your recipients will receive the full message with all its parts even if you only sent a minor part of this message from your mobile phone.

To forward or reply to an email you are reading:

1. Select **Menu > Reply** or **Menu > Forward**.
2. Choose whether you want to reply to the sender, to all email recipients, or forward the message.
3. A new email message, which includes the original message, appears. Use the keyboard to type your message. You can also edit the original message by tapping the "Edit Sender's message" link.
4. To add an email address to the email, scroll up to the To: field and tap to place the cursor in the To: field.
5. Select **Menu > Add recipient**.
6. Select a recipient from your contact list or enter the name in the search field to find the contact. The contact is added to the To: field. If a contact has more than one email address, scroll through the list and select the email address you want to use. The email address is added to the To: field.
  - To add a Cc, position the cursor so that it is in the Cc: field. Use the same procedure to add an email address.
  - If you want to include Bcc, position the cursor in the Bcc: field and use the same procedure to add an email address.
7. To set the importance of the email, select **Options > Importance**. You can set the importance as Low, Normal (default), or High.
8. If you need to save the message, tap **Menu > Save to Drafts**.
9. After you have typed your message, tap **Send**.

#### 4.3.4 Composing new emails

To compose a new email:

1. Go to **Menu > New**. A blank email message appears.
2. Add a recipient in the To: field by selecting **Menu > Add Recipient**. Select a recipient's email from your contact list or from the search field. The email field is populated. You can also add Cc: and Bcc: in the same way.
3. Enter the Subject and the body of the email.
4. If you need to save the email, select **Menu > Save to Drafts**. To delete the message, select **Menu > Cancel Message**.
5. To send the email, tap **Send**.

#### 4.3.5 Working with attachments

Using Vodafone Email Plus, you can selectively download attachments to your mobile phone one by one. Downloaded attachments can be saved on your mobile phone. To view an attachment, your phone must be able to display the attachment type, either through a native phone capability such as the Picture Viewer or through bundled software applications such as Microsoft Word or Adobe Acrobat Reader.

**NOTE:** Some file types require installation of 3<sup>rd</sup> party add-on software before the attachment can be viewed on your mobile phone. If the software is installed on the mobile phone, the attachment will display. If not, a

question mark appears to the left of the attachment name and the attachment will not open. You need to download the appropriate software onto your mobile phone in order to view the attachment. Alternatively, you can also transfer the file from your mobile phone to your PC and view it there instead. Refer to the manual that came with your mobile phone for further information about downloading 3<sup>rd</sup> party add-on software or transferring information to your PC.

When you receive a message that contains attachments, the attachment icon (an envelope with a paper clip) appears next to the message.

To download an attachment:

1. Open the message that contains the attachment.
2. Tap the name of the file at the top of the email.
3. Tap **Yes** to download the attachment.
4. A green arrow appears on the attachment icon. When the green arrow disappears, the file is downloaded to the mobile phone.
5. To view your attachment, tap on the attachment. A list of downloaded files appears. Tap the file you want to open. Alternatively, go to **Start > File Explorer** and navigate to the folder where you saved the attachment.

#### 4.3.6 Sending an email with an attachment

1. Open the email and reply, or open a new email.
2. Select **Menu > Insert**. You can insert a picture, voice note, or file.

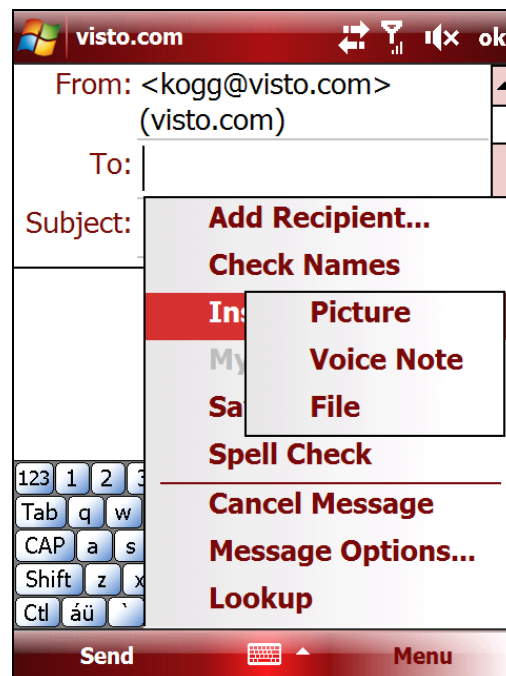

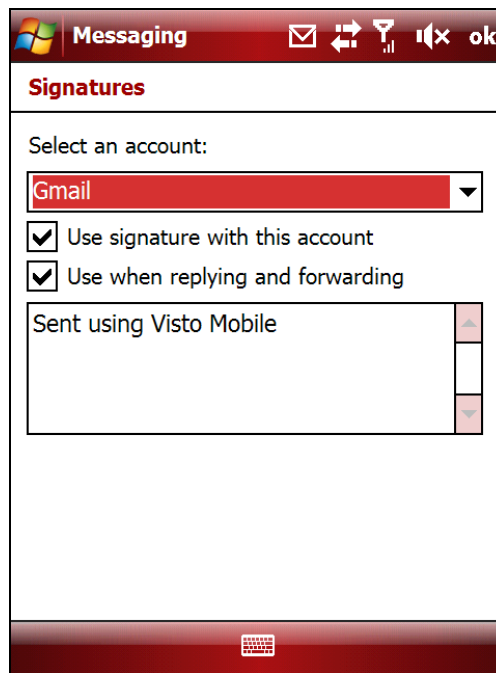

Figure 28: Select Attachment Type

3. A list of the selected file type present on the mobile phone appears. If you need to navigate to another folder, tap the pull down tap at the top of the screen. Select the folder the attachment is located in.
4. Scroll through and select the file you want to attach. The Adding Attachment progress bar displays.
5. The attachment appears in the email. Compose the email and select **Send**.

#### 4.3.7 Adding an email signature

You can create an email signature to add to the end of the email you send. To add a signature:

1. Open the mailbox.
2. Select **Menu > Tools > Options**. The Messaging Options screen appears.
3. Tap **Signatures**. The Signature screen appears.

*Figure 29: Signatures Screen*

4. Select the email account from the pulldown tab.
5. Enter your signature in the text box.
6. To include the signature with the associated account, make sure the “Use signature with this account” option is ticked. To include the signature for emails that you reply and forward, make sure the “Use when replying and forwarding” option is ticked.
7. When finished, tap **Ok** in the top right corner to close the screen. Tap **Ok** in the Options screen to return to the mailbox.

#### 4.3.8 Restoring Vodafone Email Plus services to a new mobile phone

If you are using Vodafone Email Plus and want to transfer the service to your new mobile phone, you can easily transfer your mailbox information to your new mobile phone.

1. Install Vodafone Email Plus and set up the mailboxes as described in the procedures below.
  2. Transfer your SIM card from the first mobile phone to your other mobile phone.
  3. Click on the Vodafone Email Plus icon.
  4. When you connect to the service, you are prompted to enter your password for each of the mailboxes you have set up. As soon as you enter your password for each mailbox, a mailbox is created and activated.
  5. Vodafone Email Plus automatically connects to deliver email messages and PIM updates.
- 

## 5 Working with Exchange and PIM Data

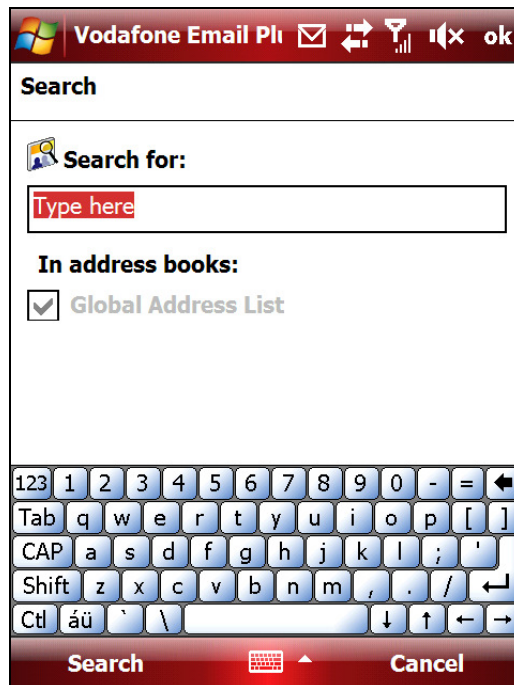

The following sections describe features available in your Microsoft Exchange account powered by Vodafone Email Plus.

### 5.1 Global Address List

You can look up an Exchange contact in the Global Address List (GAL) at any time to view a contact's name, phone number, and email address. Note that the address books of your other email accounts also appear in the Contact Lookup list. Only the Global Address List accesses the company contact list in your Microsoft Exchange account.

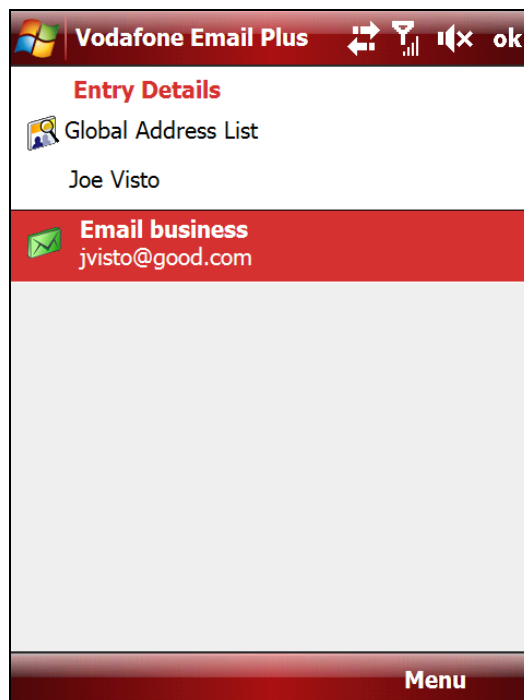

Before you can access the GAL, you need to activate a Microsoft Exchange mailbox and enable PIM data synchronisation between Microsoft Exchange and your mobile phone. For information about adding Microsoft Exchange PIM data to your mobile phone, see Section 3.1.2: How to add PIM data on page 12.

1. Select **Lookup** from the status screen. The **Search** screen appears.
2. Ensure that the Global Address List box contains a tick mark.

*Figure 30: Global Address List*

3. Enter the contact information in the Search for field and tap **Search**. A list of contacts with matching names appears.

*Figure 31: Contact Entry*

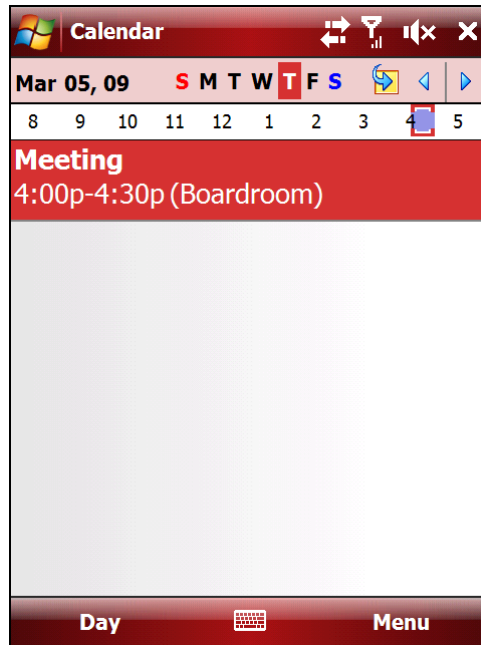

4. Highlight the desired contact and select **Open** to view more information about the contact. This usually includes email and phone number.
5. You can opt to use the contact's information (email address), add the contact to your contact list on the mobile phone, or use the contact's information and then add to your contact list. Select **Menu** to access these options.

You can access the GAL when composing an email. To access the GAL from an email message:

1. Open a new email or reply to an email in your Exchange mailbox.
2. Place the cursor in the To: field.
3. Tap **Menu > Lookup**.
4. Enter the name into the search field and ensure the Global Address List is selected. Tap **Search**.
5. Tap the name that matches the contact you want to send the email to.
6. Highlight the email address and tap **Menu > Use Once** to add the email to the To: field.
7. Follow the above procedure to add more email addresses. Tap **Send** to send the email.

## 5.2 Calendar

When using Vodafone Email Plus, you can access your Microsoft Exchange calendar on your mobile phone. When you receive a meeting notification in your Exchange account, you can view meeting details and accept the meeting. The mobile phone calendar synchronises with your Exchange account to ensure that the calendar on your mobile phone is always up to date. Calendar entries for 90 days in the future and 14 days in the past are included.

*Figure 32: Calendar Entry*

### 5.2.1 Viewing your calendar

When you open your calendar, you can view your meeting schedule. The current viewing mode is indicated in the lower left corner. The view options are Day, Week, Month, Year, and Agenda (default view). Tap **Day**, **Week**, **Month**, **Year**, or **Agenda** to change your calendar view.

You can use the settings feature of your mobile phone to set a tone alert to notify you when a meeting is about to take place.

Tap an appointment in the calendar to view more details.

### 5.2.2 Accepting a meeting request

1. Open the meeting request email in your account. The meeting icon looks like a small calendar.
2. From the meeting invite, tap **Accept** to accept the meeting request. From the pop up menu, you can edit your response, send the response, or choose not to send the response. Tap **OK**.
3. When you accept a meeting, you can choose to send an immediate response, edit and then send the response, or send no response.
4. Optionally, you can tentatively accept the invitation, decline the invitation, suggest a new time, or reply to the sender. Tap **Menu** to select your response.
5. The meeting will appear in your calendar. Calendar updates to your mobile phone will synchronise and appear in your Exchange Calendar.

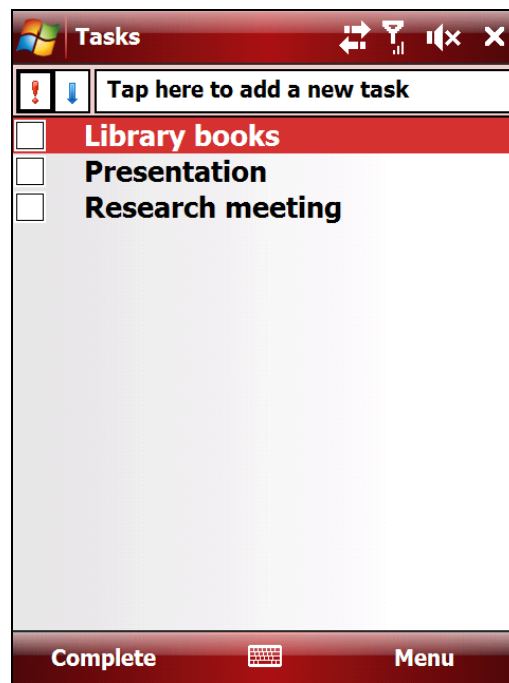

### 5.2.3 Adding a new appointment

1. Tap **Calendar** in the Status screen.

2. Tap **Menu > New Appointment**.
3. Enter the appointment information into the fields. This includes the subject of the meeting, location, time, occurrence, and reminder.
4. Tap **OK** at the top right of the screen. The meeting appears in your calendar.

### 5.3 Task list

You can use Vodafone Email Plus to access your Exchange task list. To work with your tasks, select **Tasks** from the Status screen.

*Figure 33: Task List*

If you have combined your task list with your Exchange Account with the tasks already present in your mobile phone, the tasks from both your Exchange account and your mobile phone appear.

To add a new task, select **Menu > New Task**. Enter the details into the various fields. The various pull down tabs allow you to set priority, due dates, and reminders. When complete, tap **OK** in the top right corner. The new task appears in the Tasks screen.

To view details about a task, tap the task. You can view due dates, priority and other information. Tap **Edit** to enter more details about the task.

To mark a task as complete, tap the check box to place a check mark. You can also tap **Complete**.

Tap **Activate** to make a selected task active. The task is now an item that needs to be completed.

To change the view, select **Menu > Options**. Options including setting a reminder, showing due dates, and the task entry bar. Tap **Ok** in the top right corner when you have finished setting the options.

To delete a task, select **Menu > Delete Task**. Click **Yes** to verify that you want to delete the task.

---

## 6 Vodafone Email Plus Online

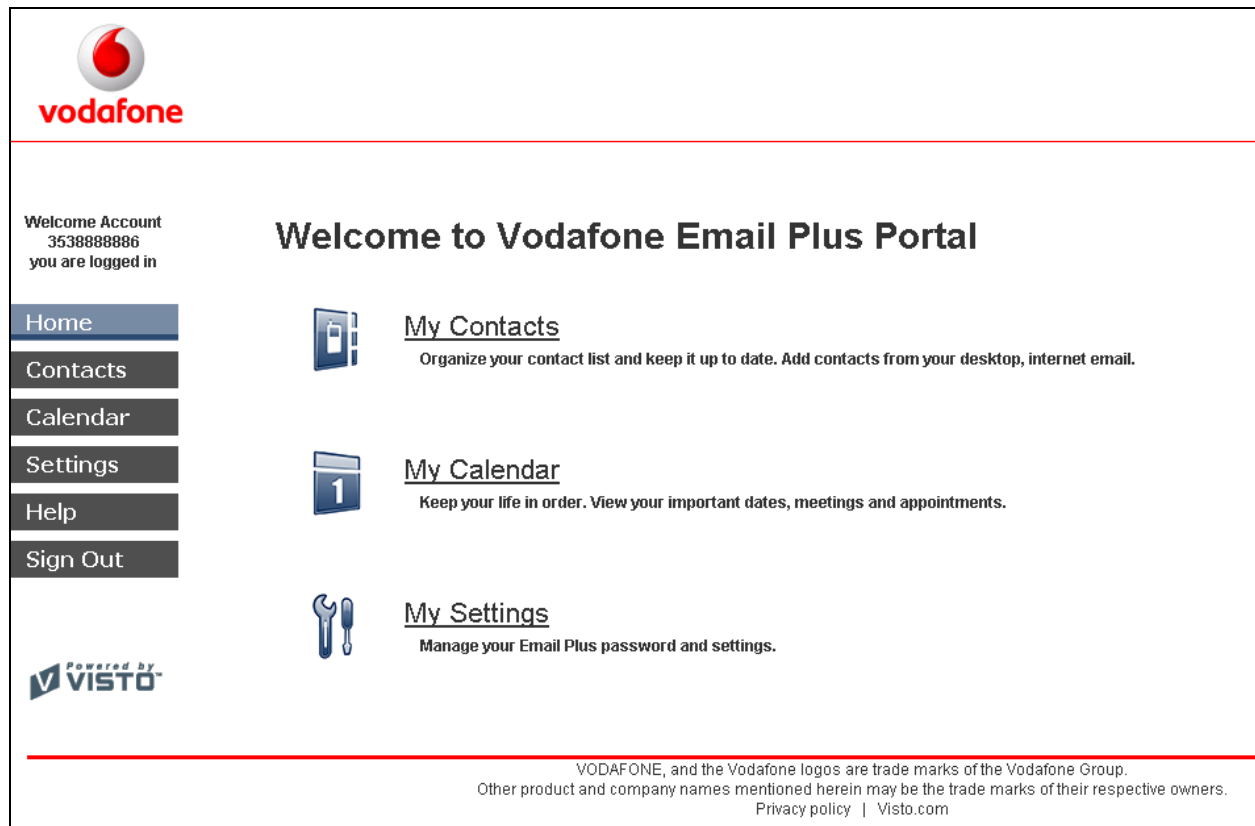

Vodafone Email Plus Online is a web-based repository for storing data, such as your calendar and address book. Your mobile phone and Vodafone Email Plus Online are always in sync. You can update your address book and calendar from any web browser. Changes to Vodafone Email Plus Online will automatically appear on your mobile phone. If you switch mobile phones or lose your mobile phone, your information from Vodafone Email Plus Online is easily transferred to a new mobile phone.

You can access Vodafone Email Plus Online from this web address (which is sent to you in the Welcome Email):

<https://emailplus.vodafone.ie>

**Figure 34: Login Screen**

When the Login screen loads, you are prompted for your mobile number and your system password (the default password is always set to the password of the first mailbox you activated on Vodafone Email Plus).

**Figure 35: Welcome Screen**

The Welcome screen displays the navigation links to access your contacts and calendar. You can also access your Vodafone Email Plus account settings.

**Figure 36: Contacts Screen**

### 6.1.1 Managing contacts

You can add contacts from a selected email account. Your mobile phone synchronises with Vodafone Email Plus Online and adds the contacts to your mobile phone. This section describes how to add a contact using Vodafone Email Plus Online.

Icon	Purpose
	My Contacts – returns you to your contact list.
	Import Contacts – imports contacts from an email service provider account to your mobile phone. See Section 6.1.2: Importing a contact below for more information.
	Add Contact – adds a new contact to Vodafone Email Plus Online and your mobile phone. See 6.1.3: Adding a contact below for more information.
	Delete Contact – deletes the selected contact(s) from Vodafone Email Plus Online and your mobile phone. See 6.1.4: Deleting a contact below for more information.
	Export Contacts – exports a contact from your contact list to an email service provider (Gmail or Hotmail) mailbox. See Section 6.1.5: Exporting contacts on page 41.
	Merge Contact – allows you to combine contacts that are duplicates. See Section 6.1.7: Merging Contacts on page 42.

**Table 1: Contact Icons**

### 6.1.2 Importing a contact

1. Select the email service provider mailbox you want to import contacts from.
2. Enter the password for the selected email service provider account, and select the contacts to import.
3. The imported contacts are added to your contacts list and are synchronised to your mobile phone.

### 6.1.3 Adding a contact

1. Select **My Contacts** from the Welcome Screen.
2. To add a contact, click the  icon.
3. Enter the contact details. The various tabs organize the information into Personal Information, Phone Numbers, Internet Address, and Postal Addresses
4. Click **Save** when finished. The contact is added to your contact list.

### 6.1.4 Deleting a contact

Select the contact(s) in the list by placing a tick mark in the checkbox. Click the Delete Contacts icon.

### 6.1.5 Exporting contacts

Use the Export Contacts feature to export a contact from one email account to another selected email account. When you log into your email account, the exported contact appears in your contact list

1. Select contact(s) from your contact list by placing a tick in the checkbox.
2. Click the Export Contacts icon.
3. Select the email account you want to export the contact to.
4. Enter your login information.
5. When the contact is exported, click OK to close the pop up box.

### 6.1.6 Editing contacts

To edit a contact, select the contact from the list. Use the fields to edit contact details and click **Save**.

### 6.1.7 Merging Contacts

Duplicate contacts may be created when you combine PIM data with contacts on your mobile phone. Use Merge Contacts to combine selected contacts together.

To merge a contact:

The screenshot displays the Vodafone Email Plus web interface. At the top left is the Vodafone logo. Below it, a sidebar contains navigation links: Home, Contacts (highlighted), Calendar, Settings, Help, and Sign Out. The main content area shows a 'Welcome Account 3538888886 you are logged in' message. A 'Contact search:' field is present. A red banner at the top right says 'Welcome You have 4 contact(s)'. Below this is a table of contacts:

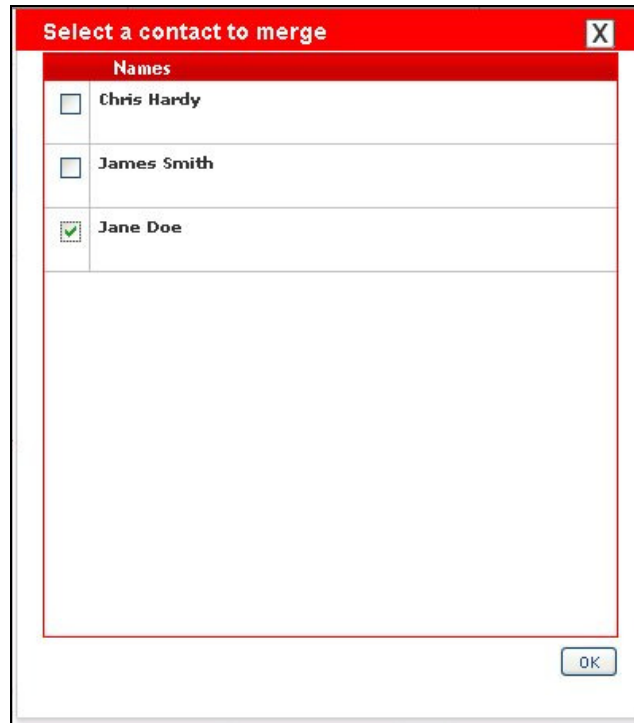

<input type="checkbox"/>	Name	Email	Phone
<input type="checkbox"/>	Chris Hardy	N/A	M: 12396596 W: 12458285
<input type="checkbox"/>	James Smith	N/A	M: 957618894
<input checked="" type="checkbox"/>	Jane Doe	N/A	M: 12345678
<input type="checkbox"/>	Jane Doe	N/A	H: 5678912

Below the table is the 'CONTACT'S SUMMARY' for Jane Doe, showing fields for Name, Home Address, Birthday, Organization, Work Website, Telephone, Email, and Notes. A red button labeled 'View Jane's Full Profile!' is on the right. At the bottom right are 'Edit' and 'Delete' buttons. The footer includes the 'Powered by VISTO' logo and a disclaimer: 'VODAFONE, and the Vodafone logos are trade marks of the Vodafone Group. Other product and company names mentioned herein may be the trade marks of their respective owners. Privacy policy | Visto.com'.

**Figure 37: Select a Contact To Merge**

1. Select a contact from your contact list by placing a tick mark in the box. (In the example above, there are two Jane Does that can be merged together.)

2. Click  in the toolbar. The "Select a contact to merge" pop up box appears.

**Figure 38: Select a Contact To Merge**

3. Select a contact to merge from the pop up list and click **OK**.

**Figure 39: Address Book Cleaner**

- In the Address Book Cleaner, use the radio buttons to select the information you want to combine into one contact.
- Click **Save**. The duplicate contacts are merged into one contact. The contact entry is updated in Vodafone Email Plus Online and the contact data is updated on your mobile phone.

## 6.2 My Calendar

The calendar allows you to manage your appointments. You can add, edit, or delete an event.

**Figure 40: Calendar Screen**

The calendar displays events for the current week. To view more details about an event, click the link. Clicking the event link also allows you to edit event details.

To view past events, click the left arrow. To view future events, click the right arrow and the top of the week view.

Click the **+** icon add an event. Enter event details into the Add Event screen and click **Add Event**.

Click **Today** to view current calendar events.

The calendar in the upper right corner allows you to navigate to a selected month. Use the arrows to navigate to the desired month. Select a day to view events for that day.

## 6.3 My Settings

**MANAGE SETTINGS**

Privacy policy | Visto.com

**Figure 41: My Settings**

The Settings panel allows you to change your time zone and set a new password.

### 6.3.1 Timezone

To select a new timezone, use the pull down tab to select the correct time zone and click **Save**. Your calendar is updated to the set timezone.

When viewing the calendar information via Vodafone Email Plus Online, you can update the timezone to match the current timezone you are travelling in. For example, if you are travelling abroad to a different time zone, this will allow you to adapt the calendar view on Vodafone Email Plus Online to your current time.

**NOTE:** Any calendar information viewed on your mobile phone will always be adapted to the time settings on your phone.

### 6.3.2 Password

To change your Vodafone Email Plus Online password, type your current password and the new password in the appropriate fields. Click **Save**.

---

## 7 Special Functions and Settings

The Vodafone Email Plus **Menu**, found on the **Status** screen, enables you to connect and disconnect the Vodafone Email Plus application and view and interact with various service-related messages.

### 7.1 Upgrade

Periodically, new versions of the Vodafone Email Plus application for your mobile phone are released. When this occurs, upgrading is easy.

As soon as a new software upgrade is available for your phone, Vodafone Email Plus presents a service message at the top of your Inbox or Status Screen called **Upgrade Available** or **Upgrade Required**. You can decide to accept or delay the upgrade until later.

**NOTE:** If you delay the upgrade more than 3 times, the Service Message may disappear and you may have to manually request the upgrade by selecting **Menu > Upgrade** from the Status screen.

You do not need to backup your email or PIM data before upgrading. Just follow the upgrade instructions to install the latest version of Vodafone Email Plus. To perform a manual check if an upgrade is available, select Upgrade from the **Options** menu.

### 7.2 Connect and disconnect

The **Connect** and **Disconnect** menu options control your connection status. This is a toggle switch with the active menu option appearing greyed out. To disconnect, tap the time underneath **Connected** in the **Status** screen. Tap **Disconnect** and confirm that you want to disconnect.

To reconnect to Vodafone Email Plus, tap the time underneath **Disconnected** in the **Status** screen. Confirm that you want to connect.

### 7.3 Managing mailboxes

If you need to change the password for a particular mailbox, highlight the mailbox in the **Status** screen. Select **Menu > Mailboxes > Edit Mailbox**. Enter the account name (optional) and the new password in the Password field. Tap **Login** when complete.

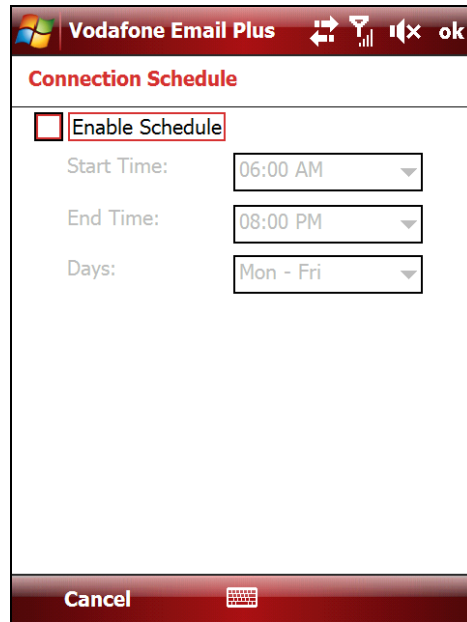

If you need to delete a mailbox from your mobile phone, highlight the mailbox in the **Status** screen. Select **Menu > Mailboxes > Delete Mailbox**. Confirm that you want to delete the selected mailbox. Note that this does not delete your email account.

### 7.4 Settings

The **Settings** menu options set your connection schedule and set the message limits for each of your Inboxes.

#### 7.4.1 Connection schedule

When you enable the Connection Schedule, you can specify when Vodafone Email Plus is enabled and sending email and PIM data to and from your mobile phone.

**Figure 42: Connection Schedule**

1. Select **Menu > Settings > Connection Schedule** to activate the function.
2. Check the Enable Schedule box.
3. Set the start and end times to confirm when Vodafone Email Plus will be operational. You have the option to set Vodafone Email Plus to run Monday through Friday, everyday, or on a custom set of days.
4. Once you have set up your preferred schedule, click **OK** to activate the Connection Schedule.

#### **7.4.2 Message limit**

In order to preserve memory, you can set the limit for the number of emails in each of your mailboxes. This limit applies to each mailbox you have. When the limit is reached, the oldest messages disappear from the email list as new messages arrive. Messages are not deleted from your email account. The maximum number of Inbox messages you can have in each mailbox is 1000. To change your message limit, go to **Menu > Settings > Message Limit**. Enter a number between 10 and 1000 in the box and tap **ok**.

## **8 Tips for Using Vodafone Email Plus**

The following are a few tips to help you get the best experience out of Vodafone Email Plus on your mobile phone.

- You can opt to receive alerts when new email messages arrive, when a task is due, or when a meeting occurs. To select how you want to be notified when a new email message comes in, select **Start > Settings > Sounds & Notifications** and select your option for **New Email Message**. You can have a ring tone play or set your mobile phone to vibrate when a new email arrives.

- If you switch to a new mobile phone or lose your mobile phone, use Vodafone Email Plus Online to transfer your information to your new mobile phone.
- **Important!** – Your monthly fee for the Vodafone Email Plus service may not include roaming. If you do not wish to be charged for your email whilst roaming, you can turn off the service. Open Vodafone Email Plus by clicking the icon. In the **Status** screen, tap the **Connected** link at the top of the screen. Tap **Disconnect**. Remember to reconnect the service when you return home.
- Use Vodafone Email Plus to view, create, and send email. Your mobile phone may have a separate email application that may not use the features described in this user guide.
- To uninstall the Vodafone Email Plus application from your mobile phone:
  1. Exit Vodafone Email Plus.
  2. Go to **Start > Settings**.
  3. Select the **System** tab.
  4. Tap **Remove Programs**.
  5. Select **Vodafone Email Plus** from the program list and tap **Remove**.
  6. Confirm that you want to remove Vodafone Email Plus by tapping **Yes**.

**Note:** You may still be charged for the service. To cancel the subscription, contact Vodafone Customer Service.

## 9 Troubleshooting

There are times when you may need some more help to understand temporary failures. Please keep in mind that many problems can be resolved by soft resetting your mobile phone. To reset your mobile phone, turn it off, remove and reinsert the battery, and turn the mobile phone back on. If this does not resolve your problem, please use the following table to determine how to diagnose your problem and determine who to contact to resolve your problem:

Problem	Solutions
<b>Activation Issues</b>	
I can't download the application or activate the service	<ul style="list-style-type: none"> <li>• Check your APN settings. Only the Vodafone Live APN can be used to access and connect to Vodafone Email Plus.</li> <li>• Network connectivity: Try again, since it may be a temporary problem due to intermittent network coverage.</li> <li>• If this does not work, please contact your Vodafone Retail Store or call Vodafone Customer Care to verify your ability to use mobile data and check the status of your Vodafone Email Plus subscription.</li> </ul>
I can't activate a mailbox using the application	<ul style="list-style-type: none"> <li>• This could be caused by bad connectivity in your local area: Try again, since it may be a temporary problem due to intermittent network coverage.</li> <li>• This may be due to wrong email credentials. Verify that the username and password credentials entered on the handset are the same as when you access your email account via the web.</li> <li>• Check with your Email Provider: If this does not work, please contact your Email Provider to verify the exact settings required to access your email account via POP or IMAP.</li> </ul>
I forgot my password	<ul style="list-style-type: none"> <li>• If you forgot your Vodafone Email Plus password, contact Vodafone Customer Support.</li> <li>• If you have forgotten your email password, contact your ISP or Email Provider for assistance.</li> </ul>
<b>Usage Issues</b>	
I cannot receive email using the service	<ul style="list-style-type: none"> <li>• The application may have lost connectivity: Verify the status of the Vodafone Email Plus application. Ensure that the Vodafone Email Plus application is connected by opening the Status Screen and then select the menu option "Connect". Please ensure that you have mobile network coverage and allow a few minutes to connect again.</li> <li>• You may need to enable POP/IMAP access for your email account: Verify if your mailbox is enabled for POP/IMAP access by logging in to your email account via Webmail.</li> <li>• You may need to wait up to 15 minutes for new email to arrive: Your email delivery may be delayed if there is a need to poll your email account. Please wait 15 minutes and check if the email arrives.</li> <li>• You do not receive any Hotmail email if you are marked as</li> </ul>

Problem	Solutions
	<p>"Online" in the PC version of MSN Messenger: Reconfigure your Messenger status to be different than "Online" and send yourself an email to trigger delivery of new messages.</p>
I cannot send email using the service	<ul style="list-style-type: none"> <li>• The application may have lost connectivity: Verify the status of the Vodafone Email Plus application. Ensure that the Vodafone Email Plus application is connected by opening the Status Screen and then select the menu option "Connect". Please ensure that you have mobile network coverage and allow a few minutes to connect again.</li> <li>• Your email message may be temporarily stuck in the Outbox: Check if your email message is stuck in the Outbox folder on the handset. If you can see the message in the Outbox you may want to "Disconnect" and "Connect" again. This will force the device to try sending the email message again.</li> <li>• Your Email Provider may have temporarily blocked your account: Check if you can still login to your email account via Webmail. Certain Email Providers may from time to time issue challenges that could affect outbound email delivery. In this case you will need to accept/solve the challenge in your webmail account before retrying to send email from your mobile handset.</li> </ul>
I have sent a message but it is not received	<ul style="list-style-type: none"> <li>• Check that the message is not stuck in your local Outbox folder on the mobile phone. If this is the case, you may want to disconnect from Vodafone Email Plus and connect again. This should submit your message from the Outbox.</li> <li>• The message may have been caught in the spam folder of your recipient's email account. Ask the person you sent the email to check the spam folder. For more information on how this situation can be avoided, please see Question 8 in the FAQ section.</li> </ul>
I have requested an attachment, but it does not download	<ul style="list-style-type: none"> <li>• This may occur if your mobile phone is low on memory. Free up some memory by decreasing your inbox message limit (refer to Section 7.4.2: Message limit on page 48) or by deleting files on your mobile phone, and try to download the attachment again.</li> </ul>
I can't synchronise updates to my contacts or calendar	<ul style="list-style-type: none"> <li>• The application may have lost connectivity: Verify the status of the Vodafone Email Plus application. Ensure that the Vodafone Email Plus application is connected by opening the Status Screen and then select the menu option "Connect". Please ensure that you have mobile network coverage and allow a few minutes to connect again.</li> <li>• You may need to wait up to 30 minutes for new PIM items to arrive: Your PIM updates may be delayed if there are many new items to synchronize. Please wait 30 minutes and check if the PIM data has arrived. If you still have a problem, you may want to "Disconnect" and "Connect" again since this will force another attempt to synchronize your PIM data.</li> </ul>

**Table 2: Troubleshooting**

---

## 10 Frequently Asked Questions

This section lists answers to some of the most frequently asked questions.

### Question 1: How many email accounts can I activate using Vodafone Email Plus?

- You can activate and use up to 5 email accounts at the same time.

### Question 2: Do I have to configure my ISP mailbox to receive email via Vodafone Email Plus (e.g. switch on POP access)?

- Microsoft Exchange: Vodafone Email Plus will automatically detect your account using the same settings as you normally enter via Outlook Web Access to access Exchange. Check with your Administrator if you have any issues to activate or connect.
- Hotmail: Vodafone Email Plus will automatically detect your account. No need to worry about settings.
- Gmail: Vodafone Email Plus will automatically detect your account. If you have not yet enabled POP/IMAP access, this will be automatically turned on for your Gmail accounts. No need to worry about settings.
- Most ISP Email Providers allow free access POP/IMAP access by default, but there are some exceptions. If access to your mailbox does not work, please contact your Email Provider to verify if your email account can be accessed via POP or IMAP.

### Question 3: Is Vodafone Email Plus easy to use?

- Vodafone Email Plus is designed to offer maximum convenience and provide information at your fingertips. Your mobile phone will receive updates as soon as these are available from your email account.
- Vodafone Email Plus updates your mobile phone automatically in the background and makes information instantly available the next time you look at your mobile phone.
- You can turn off the mobile phone knowing that the Vodafone Email Plus will resume automatically when your mobile phone is turned on again.

### Question 4: How do I know if Vodafone Email Plus is working properly?

- Vodafone Email Plus offers a simple user experience even under difficult conditions, e.g. during low or intermittent connectivity.
- When using Vodafone Email Plus, you will be able to view the reason for any service interruptions at the top of your inbox. For example, if you drop out of connectivity for a while Vodafone Email Plus is going to display a status message with the text "Disconnected" in your inbox. This message will go away automatically when the problem is corrected.

### Question 5: Can I trust that my user credentials (email address and password) are securely stored and shared in Vodafone Email Plus?

- Your user credentials are stored in encrypted format on your mobile phone. To login and access your email account, the user credentials are shared with your Email Provider over a secure connection (if your Email Provider supports secure connections). If in doubt, please check with your Email Provider.

### Question 6: If I change my email password, can I still receive email via Vodafone Email Plus?

- If you change your email password, your Vodafone Email Plus inbox is going to display an authentication error the next time you try to connect. If you select and click on this authentication error, you will be prompted to enter your new email password for this account before reconnecting to receive email again.

**Question 7: If my corporate network password changes, can I still access my Microsoft Exchange account via Vodafone Email Plus?**

- You will continue to receive updates to your Microsoft Exchange account via Vodafone Email Plus, except if login to your Microsoft Exchange account is authenticated via the password to your Windows Domain. In this case, please refer to Question 4 for information on how to update Vodafone Email Plus after a change of email password.

**Question 8: If I have activated multiple email accounts on Vodafone Email Plus, how do I know which inbox will display on the home screen?**

- The home screen is automatically going to display all of your email accounts, including the name of your inbox, the number of unread email messages, and the connection status of your Vodafone Email Plus service.

**Question 9: Which folders can I synchronise with Vodafone Email Plus?**

- The Inbox is the only folder that is synchronised with your ISP, Gmail, Hotmail or Microsoft Exchange mailbox.
- You can use other folders locally on your device, Sent Items, Outbox, etc.

**Question 10: Does Vodafone Email Plus keep my email in sync with my email account?**

- Vodafone Email Plus synchronizes read, unread, replied, and forwarded status flags with Hotmail, Gmail and other IMAP-enabled email accounts. This means that email actions you take using Vodafone Email Plus on your mobile phone will be visible when you login to your email account.

**Question 11: Do messages I send from Vodafone Email Plus get copied into the Sent Items folder on my email account?**

- By default, Vodafone Email Plus sends your outbound email messages via your email provider's SMTP server. In this case you will find copies of messages you send from Vodafone Email Plus in the Sent Items folder on your email account.
- Some Email Providers may impose restrictions that do not allow 3<sup>rd</sup> party access to the SMTP server and this may block Vodafone Email Plus from sending your messages via your home domain. In this case, your messages will be sent from Vodafone Email Plus and there is a risk they may be marked as spam by the recipient's Email Provider. Please contact your Email Provider to confirm if 3<sup>rd</sup> party access to the SMTP server is allowed and reconfirm the exact settings, then contact Vodafone to have these settings automatically configured in Vodafone Email Plus for your email domain.

**Question 12: What should I do if my mobile phone with Vodafone Email Plus is lost or stolen?**

- Contact Vodafone immediately to bar your SIM card which will prevent further use of your mobile phone.
- On your request, Vodafone can also remove all user data from Vodafone Email Plus, including email, contacts, calendar and tasks stored on the mobile phone.
- Please note: Vodafone Email Plus has made a backup of your email, contacts, calendar and tasks. This will enable you to restore your service quickly and easily onto a new mobile phone as long as it is supported by Vodafone Email Plus.

**Question 13: How do I restore Vodafone Email Plus onto a new mobile phone?**

- Ensure that your new mobile phone is supported by Vodafone Email Plus.
- When you activate the Vodafone Email Plus service on your new phone, you will be prompted to confirm the passwords of any email accounts you had activated on your old phone.
- As soon as all the passwords are confirmed, your new mobile phone will synchronise to receive and update your email, contacts, calendar and task information.

**Question 14: What is the impact of Vodafone Email Plus on my mobile phone's battery life?**

- Vodafone Email Plus has been specifically optimized to send/receive as little data as possible and this minimizes your mobile phone's battery consumption. Therefore, you should not need to recharge your phone more than once a day under normal conditions.

**Question 15: Can I continue to use Vodafone Email Plus when roaming?**

- You decide if and when you want to use Vodafone Email Plus if you are roaming. However, you risk incurring additional data roaming charges according to the operator you use when roaming. If you should wish to switch off Vodafone Email Plus to limit usage when roaming then you can manually disconnect the application for as long as you want (but please note that you will not receive any updates when the application is disconnected).
